

Realm: Land Ice					
Date	Reviewer's Name	Reviewer's Institution	Component	Comment	ES-DOC Response <i>(include the date, the responder's name, and the new version number if implementing any changes)</i>
2017-11-21	Christian Rodehacke	Danish Meteorological Institute	Dynamics > Timestep	If the ice sheet/ice shelf model uses an adaptive time scheme, what time step of the ice scheme shall we report for "Dynamics > Timestep"; longest, shortest, mean?	Added a question on the presence of an adaptive time scheme, and if there is one then any reasonable, representative timestep may be reported (0.5.0) David Hassell
2017-11-21	Christian Rodehacke	Danish Meteorological Institute	Model Name	Shall we also include the version number/ID for publicly available code?	Added questions on repository, code version and code languages in key properties (0.5.0) David Hassell
2017-11-21	Christian Rodehacke	Danish Meteorological Institute	General question	If a surface mass balance model is used as a chain element between a coupled climate model and an ice sheet model, what shall be report?	Added question ice -> mass_balance -> surface_mass_balance question (0.5.0) David Hassell
